Des Moines Laboratory Update

Date: September 5th, 2024

CMV IgG and Toxo IgG Bioplex Backorder:

The reagents used by MercyOne Des Moines Laboratory to test CMV IgG and Toxoplasma IgG are on a national Backorder until the end of September. Starting September 5th, we will be sending out Cytomegalovirus IgG antibody (CMV IGG) and Toxoplasma IgG antibody (TOXGT) to a reference lab using a different platform until we are able to regain testing capabilities. You may experience a delay in turnaround times. We apologize for the inconvenience.

Thank you for choosing MercyOne Des Moines Laboratory.
