

## REQUEST FOR REFERRAL EVALUATION

### Indications for Neuropsychological Consultation

Neuropsychological consultation has a major role in diagnosis, rehabilitation, educational and vocational planning. It is especially valuable as an objective measure of pre- and post-treatment assessment. Patients who would benefit include adults and adolescents with the following conditions or needs.

- Acquired brain injury (e.g., stroke, traumatic brain injury, central nervous system infection, toxic encephalopathy, brain tumor or hypoxia).
- Degenerative disease (e.g., Alzheimer’s disease, Parkinson’s disease, Huntington’s disease, multiple sclerosis).
- Medical conditions affecting central nervous system function (e.g., cardiovascular, renal, liver, respiratory disorders and Lyme disease).
- Memory, attention or language problems that impair functioning.
- Identification and description of cognitive abilities in preparation for surgical treatments (organ transplant, neurosurgery, etc.), including post-surgical testing.

### Patient Information

Patient Name: \_\_\_\_\_ DOB: \_\_\_\_\_

Patient Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Phone Home: \_\_\_\_\_ Work: \_\_\_\_\_ Cell: \_\_\_\_\_

Insurance: \_\_\_\_\_ Insurance #: \_\_\_\_\_ Contact #: \_\_\_\_\_

Diagnosis: \_\_\_\_\_ Referring Physician: \_\_\_\_\_

Date of Injury (if applicable): \_\_\_\_\_

### Referral Question(s)

- Please provide neuropsychological diagnosis.
- Given the patient’s condition, please provide clinical information related to the nature and severity of any emotional, cognitive or behavioral symptoms.
- Please provide insights related to the status of basic ADLs and IADLs such as the ability to function in academic or vocational environments, driving, managing finances, etc.
- Please provide information related to neuropsychological prognosis, emotional status, coping resources, and indications for psychotherapy or cognitive rehab.
- Other: \_\_\_\_\_

**\* Please attach office notes that document condition and emotional/cognitive concerns.**

**\* Include neuroimaging studies, demographics page and insurance card.**
