Des Moines Laboratory Update

Date: July 22, 2022

Interrupted Website Access

MercyOne Medical Center is currently experiencing issues related to website access. Our IT teams are engaged and working to restore functionality as quickly as possible. We apologize for this inconvenience.

Mayo Testing Delays

Testosterone Total, Bioavailable, Free and 1,25-Dihydroxyvitamin D

Please note the delays for the following tests referred to Mayo Clinical Laboratories for testing:

Testosterone, Total, Bioavailable, and Free, Serum (TTFB) and Testosterone, Total and Free, Serum (TGRP) are delayed due to methodology change that caused a temporary pause in testing. All samples submitted are expected to be tested, however, there will be a delay in reporting due to this pause.

1,25-Dihydroxyvitamin D, Serum (DHVD) will be delayed until further notice due to reagent issues.

Fructosamine Now Performed at MercyOne Des Moines Laboratory

MercyOne Des Moines Laboratory now tests Fructosamine (FRUCTOS) in-house. The new normal range for this testing is 150-300 mcml/L. There is no change to pricing, CPT code, etc.
